Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 5, 8 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Sugimoto et al. (U.S. Patent Number 4,649,743).

Sugimoto et al. teach frequency analyzing means of calculating data of frequencies of the plurality of rotating bodies by analyzing frequencies of the data of the sounds or vibrations (see col. 3, lines 38-57); order converting means of calculating orders in response to specifications of the plurality of rotating bodies based on data of frequencies of the plurality of rotating bodies (see col. 3, lines 24-37); speed converting means of calculating speed of the vehicle based on data of the number of revolutions of the plurality of rotating bodies (see col. 2, lines 25-41); and means of displaying acoustic pressure levels acquired based on the data of the sounds or vibrations in a manner corresponding to the orders and the vehicle speed (see col. 4, lines 33-53).

Allowable Subject Matter

2. **Claims 2-4, 6 and 7** are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter:

None of the prior art of record teaches or suggests means of reproducing sounds having a specified order selected based on display of the displaying means.

Prior art

3. The prior art made record and not relied upon is considered pertinent to applicant's disclosure:

Kawasaki et al. ['646] disclose gear noise evaluation system.

Kostun ['595] discloses method of tuning a vehicle.

Sasaki et al. ['979] disclose fault inspection system for rotary machines.

Meyers et al. ['596] disclose manual transmission shift evaluation device.

Contact information

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mohamed Charioui whose telephone number is (571) 272-2213. The examiner can normally be reached Monday through Friday, from 9 am to 6 pm.
